

A Word from LCPtracker's President...

We, at LCPtracker, are honored to have you as clients and users of our software service. Our commitment to you is to always give value each and every time we interact. Prevailing wage has over one hundred years of history with the first State law of Kansas created in 1891. The Federal Davis-Bacon law was passed in 1931. These laws have provided a great benefit to our country. Overwhelmingly, objective research has demonstrated that States with prevailing wage laws don't increase construction cost and provide these benefits to the community:

- Reducing occupational injuries
- Increasing the pool of skilled workers
- Building better facilities
- Reducing long-term maintenance costs
- Increasing State revenues with a better-employed and more highly skilled workforce

We are all playing a major role in helping this country understand the numerous benefits of prevailing wage. Our goal at LCPtracker is to strive to provide you the best labor compliance software service we can. To that end, we offer agencies and contractor users a fast, reliable, easy-to-use system to comply with the labor compliance laws. This is one of the key reasons we hold our annual user training conference. Not only do we believe this is a great way to better educate our users, but we also believe that your contribution will help everyone learn something. Our collective knowledge, brought into one location to capture and explore each other's experiences, is an excellent venue to continue to improve the value to you - our clients and users.

I wish you all the very best and may God bless you.

Sincerely,

Mark Douglas
President
